# Guidelines for 

## Metadata

## (DRAFT)

## 10 August 2020

[^0]This document should be reviewed on a regular basis and updated by the NSDI-WG when necessary.

## Foreword

National Spatial Data Infrastructure (NSDI) is a framework of efficient exchange and utilization of geographic information including legislation, rules, management and ICT systems.

Through the utilization of NSDI, we can expect the following three merits.

1. Removing duplication of data, investment, labour, etc.,
2. Raising efficiency of data interoperability contributing to the productivity of current work,
3. Incubating new businesses and projects.

For identification and evaluation of the geographic information, we shall develop the metadata in the same manner and share them among all stakeholders.

In order to develop the guidelines, we used the "Specifications of Japan Metadata Profile (JMP) 2.0" (by Geospatial Information Authority of Japan (GSI), [http://psgsv.gsi.go.jp/koukyou/public/JMP/jmp20spe.pdf](http://psgsv.gsi.go.jp/koukyou/public/JMP/jmp20spe.pdf), in Japanese), "Instruction Manual of JMP 2.0" (GSI, [https://psgsv.gsi.go.jp/koukyou/public/JMP/jmp20exp.pdf](https://psgsv.gsi.go.jp/koukyou/public/JMP/jmp20exp.pdf), in Japanese), "Metadata Instruction for 1:25,000 Scale Map" (by SoB), "INSPIRE Data Specifications Template" [https://inspire.ec.europa.eu/documents/data-specifications-template](https://inspire.ec.europa.eu/documents/data-specifications-template), NWRD (by WARPO) and ISO 19115-1 (Metadata - Part 1: Fundamentals).

This document, the Guidelines for Metadata, relates with the Guidelines for Data Product Specifications and the Guidelines for Data Quality. These three guidelines have been developed for the Project for Establishment of National Spatial Data Infrastructure (NSDI) for Bangladesh.

## Table of Contents

CHAPTER 1. Basic Information of Metadata ..... 1-1
1.1. What is the Metadata? ..... 1-1
1.2. Why we use Metadata? ..... 1-1
1.3. Operation of Metadata ..... 1-1
CHAPTER 2. General Rules for the Metadata Description ..... 2-1
2.1. Overview ..... 2-1
2.2. Obligation/Condition ..... 2-1
2.2.1. Mandatory (M) ..... 2-1
2.2.2. Conditional (C) ..... 2-1
2.2.3. Optional (O) ..... 2-2
2.3. Maximum occurrence ..... 2-2
2.4. Data type ..... 2-2
CHAPTER 3. Metadata Information ..... 3-3
3.1. Minimum Set of Metadata ..... 3-3

## Acronyms and Abbreviations

| No. | Abbreviation | Official name |
| :--- | :--- | :--- |
|  | DPS | Data Product Specifications |
|  | GIS | Geographic Information System |
|  | ICT | Information and Communication Technology |
|  | ISO | International Organization for Standardization |
|  | ISO/TC 211 | International Organization for Standardization/Technical Committee <br> 211 (Geographic information/Geomatics) |
|  | JISC | Japanese Industrial Standards Committee |
|  | JMP 2.0 | Japan Metadata Profile 2.0 |
|  | JPGIS | Japan Profile for Geographic Information Standards |
|  | MoD | Ministry of Defence |
|  | NDC | National Datacenter |
|  | NSDI | National Spatial Data Infrastructure |
|  | NSDI-PF | National Spatial Data Infrastructure Platform |
|  | NSDI-PP | National Spatial Data Infrastructure Pilot Project |
|  | NSDI-PPWG | National Spatial Data Infrastructure Pilot Project Working Group |
|  | NSDI-PS | National Spatial Data Infrastructure Prototype System |
|  | NSDI-WG | National Spatial Data Infrastructure Working Group |
|  | SoB | Survey of Bangladesh |
|  | SoB BM | Survey of Bangladesh's Base Map |
|  | TC | Technical Committee |

## CHAPTER 1. Basic Information of Metadata

### 1.1. What is the Metadata?

Metadata is, generally, information about dataset, dataset series, service, document, initiative, software, person or organization and other relates issues.

This document, the guidelines for metadata, contains what is the metadata and how to describe the contents of metadata for geographic information. The metadata provides information about the identification, the extent, the quality, the spatial and temporal aspects, the content, the spatial and temporal references, the portrayal, distribution, and other properties of digital geographic data.

The guidelines are applicable to:

- geographic datasets, dataset series, and individual geographic features and feature properties.

The guidelines define:

- mandatory, conditional and optional metadata contents;
- the minimum set of metadata required to serve the NSDI-PF.

### 1.2. Why we use Metadata?

Users may choice the suitable data based on the information registered as metadata. The suitable data means the data that match the user's requirements.

### 1.3. Operation of Metadata

The users can search and identify the geographic data based on the metadata information through the clearinghouse functions of the NSDI-PF.

The guidelines aim to contribute to identify the geographic information for the NSDI users.

## CHAPTER 2. General Rules for the Metadata Description

### 2.1. Overview

There are several rules for the metadata description for efficient information sharing.
Metadata is the information about a resource. The metadata elements (including the mandatory metadata elements for NSDI-PF) shall be developed and formatted in accordance with the Guidelines of Metadata.

For example, users can search/select the data based on the metadata through the clearing house.

- contents / theme / range
- price
- date of creation, acquisition
- name of the data provider, etc.

### 2.2. Obligation/Condition

Each metadata has property of the obligation/ condition. This is a descriptor indicating whether a metadata item shall always be documented in the metadata or sometimes be documented (i.e. contains value(s)). This descriptor may have the following values: M (mandatory), C (conditional), or O (optional).

### 2.2.1. Mandatory (M)

The metadata item shall be documented.

### 2.2.2. Conditional (C)

Specifies a condition that can be processed by a machine under which at least one metadata is mandatory. 'Conditional' is used for one of the three following possibilities:

- Expressing a choice between two or more options. At least one option is mandatory and must be documented.
- Documenting a metadata if another metadata has been documented.
- Documenting a metadata content if a specific value for another metadata content has been documented. To facilitate reading by humans, the specific value is used in plain text. If the answer to the condition is true, then the metadata content shall be mandatory.

### 2.2.3. Optional (O)

The metadata may or may not be documented. Optional metadata have been defined to provide a guide to those looking to document their data fully. (Use of this common set of defined contents will help promote interoperability among geographic information users and producers world-wide.) If an optional metadata is not used, the metadata contents within that metadata (including mandatory contents) will also not be used.

NOTE: Optional metadata can have mandatory contents; those contents only become mandatory if the optional metadata is used.

### 2.3. Maximum occurrence

Specifies the maximum number of the metadata item may have.
Single occurrences are shown by "1"; repeating, unbounding, occurrences are represented by "N". Fixed number occurrences other than one are allowed, and will be represented by the corresponding number (i.e. " 2 ", " 3 "... etc.).

### 2.4. Data type

Specifies a set of distinct values for representing the metadata elements; for example, integer, real, string (sequence of characters), free text, date (time may be included), and Boolean (true/false).

## CHAPTER 3. Metadata Information

### 3.1. Minimum Set of Metadata

The minimum required fields of metadata are shown in the table below.

| \# | Name | Definition | Obligation / Condition | Maximum occurrence | Data type | Remarks |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | data name | identifiable name of the data | M | 1 | string |  |
| 2 | abstract | brief summary of the data | M | 1 | free text |  |
| 3 | date of creation | the date of completion of the data creation | M | 1 | date |  |
| 4 | spatial extent | Minimum and maximum values of latitude (north, south) and longitude (east, west) in decimal degree | C | 4 | real | At least one of "spatial extent" or "administrative area" shall be registered. |
| 5 | coordinate system | ex. WGS84, <br> ITRF2014 | C | 1 | string | This shall be mandatory if "spatial extent" is registered. |

| $\#$ | Name | Definition | Obligation <br> / Condition | Maximum <br> occurrence | Data type | Remarks |
| :--- | :--- | :--- | :---: | :---: | :---: | :---: |
| 6 | administrative <br> area | Name(s) of <br> upazila, town, <br> city, district, <br> division, or <br> whole country. <br> A largest unit <br> is enough. | C | N | string | At least one of <br> "spatial <br> extent" or <br> "administrative <br> area" shall be <br> registered. |
| 7 | responsible <br> organization | Name of the <br> organization <br> that is <br> responsible for <br> the data. | M | 1 | string |  |
| 8 | contact <br> information | Contact <br> information of <br> the responsible <br> section <br> (section name, <br> telephone <br> numbers, <br> e-mail address, <br> postal <br> address ) | M | N | string |  |

## Annex

Metadata for NSDI-PF

1. Metadata for the NSDI-PF

On the NSDI-PF, the metadata items in the tables below are required to input.

Table 1 Metadata on the uploading layers page

| \# | Name | Definition | Obligation / <br> Condition | Maximum <br> occurrence | Data <br> type | Remarks |
| :--- | :--- | :--- | :---: | :---: | :---: | :--- |
| 1 | Title of data <br> Layer | name of the data | M | 1 | string |  |
| 2 | Target <br> organizations <br> for Sharing <br> Data | Access limitation of <br> organizations | M | 1 | List |  |
| 3 | Category of <br> the data | Select a category of <br> theme | M | N | date | None, <br> Administrative, |
| 4 | Date type |  | M | N | List | publication / <br> creation / <br> registration, <br> etc. |

Table 2 Metadata on the metadata pages

| \# | Name | Definition | Obligation <br> /Condition | Maximum <br> occurrence | Data <br> type | Remarks |
| :--- | :--- | :--- | :--- | :---: | :--- | :--- |
| 1 | Owner | name of the <br> responsible <br> organization of <br> the data | M | 1 | string |  |
| 2 | Title | name of the <br> data | M | 1 | string |  |
| 3 | Date | date of the <br> occurrence of <br> the data <br> related activity | M | N | date | YYYY/MM/DD |

| \# | Name | Definition | Obligation <br> / Condition | Maximum occurrence | Data type | Remarks |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 4 | Date type | type of the data related activity on the date (\#3) | M | N | code | publication / creation / registration, etc. |
| 5 | Edition | version of the data | O | 1 | string |  |
| 6 | Abstract | brief narrative summary of the data | M | 1 | free text |  |
| 7 | Purpose | summary of the intentions with which the data was developed | O | 1 | free text |  |
| 8 | Maintenance frequency | frequency with which changes and additions are made to the data after the initial data is completed | O | 1 | list | every six months, annually, every other year, every five years, occasionally, etc. |
| 9 | Regions | administrative division | O | N | list | See Table |
| 10 | Restrictions | restrictions on the access and use of the data | O | N | string |  |
| 11 | Restrictions other | additional information on the restrictions | O | 1 | free text |  |
| 12 | License | ? | O | 1 | string |  |

| \# | Name | Definition | Obligation <br> / Condition | Maximum occurrence | Data type | Remarks |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 13 | Language | the language and character set used in the data | C | N | string | mandatory if a language is used in the data |
| 14 | Spatial representation type | ? | O | 1 | string |  |
| 15 | Resource type | layer/? | O | 1 | string |  |
| 16 | Temporal extent / start | time period covered by the content of the data / start | Use obligation / condition from the reference | 1 | date |  |
| 17 | Temporal extent / end | time period covered by the content of the data / end | Use obligation / condition from the reference | 1 | date |  |
| 18 | Supplemental information | any other descriptive information about the data | O | 1 | free text |  |
| 19 | Data quality | Description of the data quality evaluation; data quality item, evaluation method, evaluation criteria, evaluation results | M | N | string | Refer the <br> "Guidelines for Data Quality" |

| \# | Name | Definition | Obligation <br> Condition | Maximum <br> occurrence | Data <br> type | Remarks |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 20 | Metadata <br> uploaded <br> preserve / <br> Featured / Is <br> Published | $?$ |  |  |  |  |
| 21 | Thumbnail <br> URL | Is mosaic / has <br> time / has <br> elevation | O | 1 |  |  |
| 22 | Time regex | regular <br> expression of <br> time | O |  |  |  |
| 23 | Keywords | Words or <br> phrases <br> describing the <br> data to be <br> indexed and <br> searched | O | N | string |  |
| 24 | Point of <br> Contact | identification <br> of, and means <br> of <br> communication <br> with, person(s) <br> and <br> organization(s) <br> associated with <br> the data | M | 1 | string |  |
| 25 | Metadata <br> Author | Creator of the <br> metadata | O | 1 | string |  |
| 26 | Category | Category of the <br> data | M | N | string |  |
